# Table of Contents

<b>Author and Acknowledgments</b>	iv	<b>Section 8: Waves</b>	
<b>Preface/How To Use This Book</b>	v	8.1 Introduction to Waves	143
<b>Pre-Test</b>	7	8.2 Sound Waves	146
<b>Pre-Test Evaluation Chart</b>	28	8.3 Water Waves	150
<b>Section 1: Laboratory Measurements, Equipment, and Safety</b>		8.4 Earthquake Waves	152
1.1 SI Units and Units of Measure	29	8.5 Electromagnetic Waves	154
1.2 Laboratory Equipment	33	Section 8 Review	158
1.3 Laboratory Procedures and Safety	37	<b>Section 9: Cell Structure and Function</b>	
Section 1 Review	41	9.1 Prokaryotic and Eukaryotic Cells	161
<b>Section 2: Scientific Investigations</b>		9.2 Cell Organelles	163
2.1 The Scientific Process	45	9.3 Plant and Animal Cells	165
2.2 Developing an Experimental Plan	47	9.4 Cellular Organization	167
2.3 Using Tables to Organize and Interpret Data	51	9.5 Cellular Respiration and Photosynthesis	169
2.4 Using Graphs and Charts to Organize and Interpret Data	54	Section 9 Review	172
Section 2 Review	61	<b>Section 10: Cellular Transport</b>	
<b>Section 3: Atoms and Elements</b>		10.1 Passive Transport: Diffusion	175
3.1 The Atom	65	10.2 Passive Transport: Osmosis	177
3.2 Introducing the Periodic Table	67	10.3 Active Transport, Endocytosis, and Exocytosis	180
3.3 Elements in the Periodic Table	70	Section 10 Review	182
3.4 Reactivity	73	<b>Section 11: Cellular Reproduction</b>	
Section 3 Review	79	11.1 The Cell Cycle and Mitosis	183
<b>Section 4: Matter</b>		11.2 Sexual Reproduction and Meiosis	186
4.1 States of Matter	83	11.3 Types of Reproduction	189
4.2 Phase Changes	87	Section 11 Review	191
4.3 Changes of Matter	90	<b>Section 12: Genetics and Heredity</b>	
Section 4 Review	96	12.1 Introduction to Genetics	193
<b>Section 5: Force and Motion</b>		12.2 Monohybrid Crosses	196
5.1 Introduction to Force and Motion	99	12.3 Sex-Linked Genes	201
5.2 Newton's First Law of Motion	103	12.4 Pedigrees	203
5.3 Newton's Second Law of Motion	105	Section 12 Review	205
5.4 Newton's Third Law of Motion	112	<b>Section 13: DNA and Genetic Mutations</b>	
Section 5 Review	114	13.1 DNA Basics	209
<b>Section 6: Force and Pressure</b>		13.2 DNA, Genes, and Chromosomes	210
6.1 Static Fluid Pressure	117	13.3 Genetic Mutations	212
6.2 Properties of Liquid Pressure	120	Section 13 Review	215
6.3 Properties of Gas Pressure	125	<b>Section 14: Classification and the Five Kingdoms</b>	
6.4 Pressure in Biological Systems	127	14.1 Taxonomy	217
Section 6 Review	130	14.2 The Five Kingdoms	220
<b>Section 7: Energy</b>		14.3 Kingdom Monera	222
7.1 Introduction to Energy	133	14.4 Kingdom Protista	224
7.2 Types of Energy	136	14.5 Kingdom Fungi	226
7.3 Energy Transformations	138	Section 14 Review	227
Section 7 Review	141	<b>Section 15: The Plant Kingdom</b>	
		15.1 Overview of Plants	229
		15.2 Non-Vascular Plants	231
		15.3 Vascular Plants	232
		15.4 Seedless Vascular Plants: Ferns	233
		15.5 Gymnosperms and Conifers	234
		15.6 Angiosperms	236
		Section 15 Review	241

**Section 16: The Animal Kingdom**

16.1	Overview of Animals	243
16.2	Invertebrates: Sponges and Cnidarians	245
16.3	Invertebrates: Worms	248
16.4	Invertebrates: Mollusks and Echinoderms	250
16.5	Invertebrates: Arthropods	252
16.6	Cold-Blooded Vertebrates (Ectotherms)	255
16.7	Warm-Blooded Vertebrates (Endotherms)	258
16.8	Animal Adaptations	260
	Section 16 Review	263

**Section 17: Nutrient Cycles**

17.1	The Water Cycle	267
17.2	The Carbon Cycle	269
17.3	The Nitrogen Cycle	271
	Section 17 Review	273

**Section 18: Ecosystems**

18.1	The Flow of Energy in Ecosystems	275
18.2	Ecological Relationships	281
18.3	Interdependence in Ecosystems	284
18.4	Natural Selection, Mutations, and Diversity	289
18.5	Human Impact on Ecosystems	294
	Section 18 Review	296

## The Authors

Kelly Davis Berg graduated from Clemson University in Clemson, South Carolina, where she earned a Bachelor of Science degree in Chemical Engineering. Besides her background in industrial research, she has worked in the field of educational publishing for 10 years, and she has taught chemistry laboratory skills to students at the high school and college levels. In addition to her role as project coordinator and executive editor for educational publications in several subject areas, she has also co-authored books in science and mathematics.

Cecilia Lowery Boles graduated from Winthrop College in Rock Hill, South Carolina, where she earned her Bachelor's and Master's degrees as well as the degree of Educational Specialist in Secondary Curriculum and Instruction. In addition to her certification in science, she holds certifications in Learning Disabilities, in Secondary Administration, and as Secondary Science Supervisor. She has taught biology, anatomy and physiology, and Advanced Placement and International Baccalaureate biology for ten years at Rock Hill High School in Rock Hill, South Carolina. Mrs. Boles began teaching at South Pointe High School in Rock Hill in the 2005-2006 school year.

Jerald D. Duncan has been involved with education for the past twenty years. He has been a classroom teacher at the middle school and high school levels, assistant to the Vocational Director, Cobb County Schools, and the Apprenticeship Coordinator, Cobb County Schools. He is also a nationally recognized Curriculum Development facilitator and teacher trainer. He is a graduate of Emmanuel College, Franklin Springs, Georgia and Georgia State University in Atlanta, Georgia.

Glen Lawrence Gumphrey graduated from Winthrop University in Rock Hill, South Carolina, where he earned his Bachelor of Science degree in Biology for Secondary Education and is certified to teach general science and biology. He has taught Honors physics, College Prep physics, Advanced biology, and physical science at Rock Hill High school for the past twelve years.

## Acknowledgments

The authors give a special thank you to the following people: Becky Davis, a retired English teacher, who volunteered to edit this text for clarity and grammar and Norma Street, a teacher of middle school and high school sciences with a masters degree in science education, who edited portions of this text for clarity and accuracy. We also wish to thank our families for their patience and understanding as we worked tirelessly to complete this project.

# Preface

The *Alabama High School Graduation Exam Student Review Guide: Science* is written to help students review the skills needed to pass the Science portion of the Alabama High School Graduation Exam, Third Edition (AHSGE). This comprehensive guide is based on the Alabama Standards and Objectives developed by the Alabama State Department of Education.

## How To Use This Book

### Students:

Passing the Alabama High School Graduation Exam (AHSGE) is required for graduation. The AHSGE is a multiple-choice exam given in five subject areas: Language, Reading Comprehension, Mathematics, Science, and Social Studies. This book is a review for the Science portion of the AHSGE.

- ① Take the pre-test found in the front of this book. The pre-test covers all the science skills tested on the AHSGE in a format similar to the actual test. The pre-test is designed to identify areas that you need to review.
- ② Score the pre-test. Using the pre-test evaluation chart, circle the questions that you answered incorrectly.
- ③ For each question that you missed on the pre-test, review the corresponding sections in the book. Read the instructional material, do the practice exercises, and take the section review test at the end of each section.
- ④ After reviewing the skills, take the two practice tests (provided as separate booklets). These practice tests are written to look similar to the actual AHSGE; therefore, they will give you practice in taking the test.
- ⑤ After taking Practice Test 1 and/or Practice Test 2, use the practice test evaluation charts, which are found directly after each practice test, to identify areas for further review and practice. The practice test evaluation charts can be used in the same way as the pre-test evaluation chart.

### Teachers:

This review guide is also intended to save you, the teacher, time in the classroom. It can be used for classroom instruction or for individual student review. Since this student guide offers review for ALL of the science skills necessary for passing the AHSGE in science, it provides you one consolidated resource of material to help your students prepare for the exam.

- ① When teaching or tutoring individual students, use the strategy outlined above for students. By taking the pre-test, students can identify areas that need improvement. The pre-test evaluation chart directs the students to the sections they need to review for instruction and additional practice.
- ② For classroom study, use this guide to supplement lesson plans and to give additional review for skills tested on the AHSGE. Purchase a class set of guides for use in the classroom or assign guides to students for out-of-classroom work.
- ③ Assign the practice tests (provided in separate booklets) as comprehensive review tests.
- ④ Use the practice test evaluation charts found after each practice test to identify areas needing further review.
- ⑤ You may want to use the pre-test to establish a benchmark for each student. Score the pre-test by counting each question as 1 point. Then, after the students have completed all the exercises in the workbook, use one or both practice test to gauge progress. You should see marked improvement between the initial and final benchmarks.
- ⑥ Please **DO NOT** photocopy materials from these guides or the practice test booklets. These guides are intended to be used as student workbooks, and individual pages should not be duplicated by any means without permission from the copyright holder. To purchase additional or specialized copies of sections in this book, please contact the publisher at 1-800-745-4706.
